

Name: Ashish Singh

Qualification: mca

Age: 24

Date: 09-May-2012

YOUR PERFORMANCE ON THE SKILLS TEST

Strength Areas

Helping Skills

A high score on this skill indicates that your primary skill lies in being perceptive to the feelings of others, and demonstrating empathy and understanding towards them. You are the **Helper**, and would do well in careers that would require you to listen patiently to others and be warm and sensitive in your interactions with people. You have the ability to adopt an objective, non judgmental approach towards people, and do not quickly pass judgment regarding their actions and behaviours. You have the knack of reaching out to people and drawing them out, and interacting with them in ways that put them at ease.

Suggested Career Options:

- 1.C-Psychology
- 2.Social Work
- 3.Teaching
- 4.Nursing
- 5.Special Education

Technical Skills

A high score on this skill indicates that you possess a flair for technology and machines, and have a facility with understanding how machinery functions. You are the **Technologist**, and will excel in professions that would call for a good understanding of mechanical and technical concepts. Not only do you have the ability to grasp the rules of physics, machinery and technology easily, but you can also apply these in practical areas.

Suggested Career Options:

- 1.Engineering
- 2.Technical Fields
- 3.Computer hardware

Developmental Areas

Ideation Skills

You find it difficult to think in creative ways and not enjoy professions where you would have to come up with implementable unusual notions and solutions.

Developmental Suggestions

You need to work on your divergent thinking skills, and utilise your imagination in better ways. Some ways to do this include:

- Try to come up with many different ways for solving a problem.
- Think of unusual approaches and ideas to tackle a commonplace situation.
- Attempt riddles and puzzles which need you to think creatively.

Motor/Physical Skills

You find it difficult to have high energy levels and good stamina ; thus , you will not enjoy professions that require constant field visits, outdoor work , & strenuous activity.

Developmental Suggestions

You need to improve your physical and motor skills. Some ways to do this include:

- Join a gym or start a daily fitness regimen to build your stamina and agility.
- Go for outdoor activities such as trekking, hiking, rock climbing and so on.
- Learn Yoga, Martial Arts or Aerobics and so forth and practice daily.

Psychologist
